OBJECTIVE

Flutter Developer with 3 years of experience building cross-platform mobile apps and responsive web applications using Flutter and React.js. Seeking a full-time position to contribute to high-quality, scalable, and user-centric app solutions. Eager to apply strong UI/UX skills, clean architecture practices, and a passion for performance optimization in a dynamic development environment

WORK EXPERIENCE

Mobile App Developer

10/2025 – Present

Insasoft Technologies

Flutter Floor Management App – Hub Business Center

Flutter • Bloc • Chopper • REST APIs • Clean Architecture • Ably • Firebase Built a multi-role tenant management system with Bloc-driven state handling and dynamic, user-specific UIs. Integrated Chopper-based REST services, Ably real-time notifications, and Firebase push messaging. Implemented clean architecture, floor/seat management flows, and secure role-based access across Android, iOS, and Web.

Flutter Developer Consultant (Freelance)

05/2025 – 10/2025

CodeScribo Technologies

- **Mr Coach Pro – Fitness & Coaching Platform Flutter • Bloc • Firebase Messaging • PlayStore** relase Improved UI/UX and implemented Bloc-based state management for trainer and client modules. Added custom reusable components, scheduling features, and Firebase messaging for real-time alerts and updates. Successfully built, configured, and released the application on the **Google Play Store**.
- **Flutter E-commerce App (Shopify Storefront Integration) (Flutter • Riverpod • GraphQL • Shopify Storefront API • MVVM • Clean Architecture)** Built a **full-featured e-commerce app** integrated with **Shopify Storefront GraphQL APIs** for **scalable performance** and **seamless shopping**. Implemented **product catalog, wishlist, order history, profile editing, and dynamic filtering** via **Shopify metafields**. Delivered **responsive UI, marketing preference toggle, form validation, and auto-refreshing updates**. Used **Riverpod** for **state management**, **GoRouter** for **navigation**, and followed **MVVM clean architecture** for **maintainability**.
- **Observation & Task Management App (Flutter • Bloc/Cubit • Drift • Sembast • get_it • Clean Architecture)** Supported and enhanced an **offline-first field data collection app** with **checklists, dynamic forms, image capture, and network-aware syncing**. Improved **stability and scalability** by **refactoring modular code**, maintaining **clean architecture**, and leveraging **Drift & Sembast** for **local persistence**.

Software Engineer

01/2023 – 06/2025

Perfectz Digital 🌐

- **School Bus Management App (Flutter • Riverpod • Firebase • OpenStreetMap • Telpo Devices)** Developed separate **staff and parent apps** for **real-time bus tracking** and **student safety**. Integrated **RFID check-in/out** with **Telpo biometric devices, GPS live tracking, and FCM notifications**. Delivered **responsive UI** with **clean architecture** and **scalable Riverpod state management**.
- **Multi-faceted E-commerce Platform (Flutter • Firebase • Stripe • Medusa API • Riverpod/GetX)** Built **three role-specific apps** (User, Driver, Store) with **seamless UI/UX**. Integrated **Stripe payments, Google Sign-In/OTP login, and real-time order notifications**. Utilized **Riverpod/GetX** for **state management** and managed **TestFlight/Firebase distributions**.
- **Bookezy – Service Booking App (Flutter • Riverpod • REST API)** Led **UI/UX development** for **smooth booking flows** with **secure authentication** and **editable profiles**. Connected to **custom REST APIs** for **real-time service discovery, booking, and scheduling**.

- **ShopLite – E-commerce Web App (React • Vite • Redux • REST API • Firebase • AWS S3)** Built a **high-performance, responsive web app** with **reusable components**. Implemented **Redux state management**, **RESTful APIs** for **products, cart, and checkout**, plus **FCM notifications**. Deployed on **AWS S3** with **modular architecture** for **scalability and maintainability**

SKILLS

Technical Skills: Flutter, Dart, FlutterFlow | **State Management:** Riverpod, Bloc, GetX, Redux | **Architecture:** Clean Architecture, MVVM, MVC | **APIs:** REST, GraphQL | **Firebase:** Auth, Firestore, Realtime DB, FCM, App Distribution | **Payments & Auth:** Stripe, RazorPay, Google Sign-In, OTP | **App Releases:** Google Play Store, Apple App Store (TestFlight) | **Tools:** Git, GitHub, Jira | **Web/Build:** Vite | **Cloud & Maps:** AWS S3, OpenStreetMap | **Device Integration:** Telpo | **Testing:** Unit, UI

Soft Skills

Communication & Collaboration: Communication, Teamwork, Collaboration **Analytical Skills:** Problem-Solving, Critical Thinking, Decision Making **Leadership & Ownership:** Leadership, Self-Motivation **Work Ethic & Efficiency:** Time Management, Adaptability

PROJECTS

AI-Powered Grammar Correction App

Flutter • Gemini API • speech_to_text • flutter_tts • Camera Preview

Designed and developed a **multimodal Flutter application** that leverages the **Gemini API** for **real-time grammar correction**.

- Integrated **camera preview** for live video input, **speech-to-text** via the `speech_to_text` package for accurate voice capture, and **text-to-speech** playback using `flutter_tts` for auditory feedback.
- Delivered an **immersive, accessible user experience** by combining visual, auditory, and voice interfaces.
- The app enhances **communication and language learning** by providing **instant grammar corrections** through a seamless audio-visual interaction flow.

Cross-Platform Chat & Location App

06/2025 – 06/2025

Developed a feature-rich chat application using **Flutter**, enabling **real-time messaging** through **Firebase push notifications** with **local SQLite storage** for offline access.

- Integrated **QR code scanning** for secure device token exchange between users.
- Built **multi-platform support** (Android, iOS, Web) with **bilingual UI (English/Arabic)** and persistent session handling.
- Fetched dynamic **country list via REST API** and rendered **Google Map view** with 2km geofencing to highlight nearby **lakes and ponds**.
- Followed **MVC pattern** and used **Riverpod** for efficient state management.

GPA-Gram panchayath app

An android application developed using Flutter, Dart, and Firebase to make the panchayath members available for the citizens. Also to aware peoples about various activities held by grama panchayath.

OPEN SOURCE CONTRIBUTIONS

Flutter Responsive Kit

Flutter Package - Self published

Flutter • Dart • Responsive Design • Package Development

Developed and published a **lightweight, extensible Flutter package** to streamline building **responsive UIs** across mobile, tablet, and desktop platforms.

- Introduced reusable utilities like `ResponsiveBuilder`, `ResponsiveText`, `ResponsiveGrid`, and layout helpers for adaptive UI construction.
- Supports **dynamic breakpoints**, clean layout APIs, and seamless integration into **scalable multi-platform apps**.
- Focused on **developer experience**, with intuitive APIs, clear documentation, and consistent updates.
- Designed for flexibility and extensibility, with a roadmap for **custom widget support**, performance enhancements, and community contributions.
